

BRAVO

Universal Mount

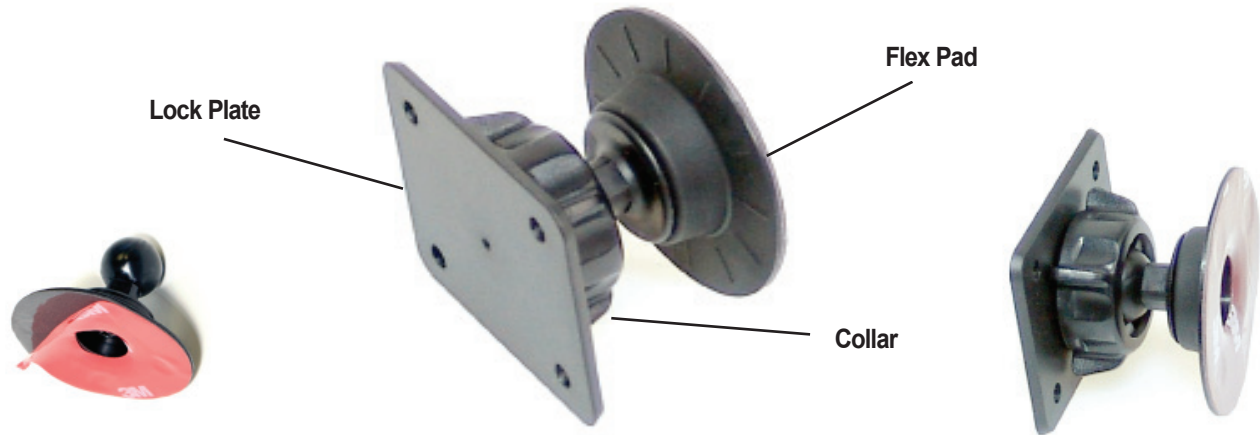

BR-202

INTERESTING FACTS ABOUT THE BRAVO MOUNT

The BRAVO Mount incorporates the same ball and socket design found on all G3 style mounts including the VSM-G3 custom brackets and the Universal G3 mount.

The small 2" Flex Pad comes with 3M adhesive made specifically for automotive applications. The adhesive is well proven and holds extremely well. It is a one time stick application, however it may be removed after time without damage to the vehicle. (Do not apply to leather)

The Lock Plate has the traditional AMPS hole pattern to accept nearly any holder or car kit. The collar has thumb tabs which allows the Lock Plate to be tightened into a set position, loosened for easy adjusting or completely removed from the ball.

The Ball is a treasure by itself. The Ball can be mounted as a custom dash mount or even a retail store fixture by drilling a hole and bolting from behind. Once in place it is ideal for displaying mobile electronics. Simply attach items to such as a Lock Plate and you have a great looking display that is easy to change, adjust or remove.

Lock Plate

Ball

Drill a 11/32" hole to mount the Ball

**To order the
BRAVO Balls (set of 6)
or the Lock Plate
