

Installation Instructions Adapter Plate for Garmin Nuvi and miPRO series Holders Part # TT-39

Please read all instructions thoroughly before proceeding.

Installation Tips

This TT-39 Adapter is produced specifically for accessories requiring a 17mm ball such as the series of Garmin Nuvi GPS units (any model). *This Adapter requires a mount*, whether vehicle specific or universal, to be properly installed. This Adapters attach directly to a VSM, VSM Legend or VSM G3 style mount in addition to any of the universal mounts from Pro.Fit International. It is best to preassemble all parts with the Garmin Nuvi GPS in order to confirm the mounting location and functionality once mounted in the vehicle.

Step One:

After selecting the mount for your vehicle, bolt the TT-39 Adapter to the mounting platform.

Step Two:

Place the Garmin Nuvi GPS with cradle over the ball and push back to snap onto the TT-39 Adapter.

Step Three:

If the mount selected is adjustable, swivel to the desired position.

Note: Pro.Fit International specializes in vehicle specific and universal mounting solutions for cars, trucks, SUV's and semi trucks. Go to: www.pro-fit-intl.com
